Air Conditioning & Heating

COMPACT, ALL-IN-ONE UNITS HELP SAVE VALUABLE SPACE

Keep your family in energy-efficient comfort for years to come. The Goodman® brand GPG13 Packaged Gas/Electric Unit provides value and cutting-edge technology to homeowners and small businesses, while helping to lower energy bills as compared to lower SEER units. Plus, our extensive product offering ensures that you get the right system for your specific cooling and heating needs.

COMFORT. SAVINGS. PERFORMANCE.

Goodman brand packaged units sit on the ground or rooftop outside your home or business and deliver quiet, year-round cooling and heating comfort from a single, self-contained unit. The energy-efficient GPG13 Goodman brand Packaged Gas/Electric Unit operates as an electricity-powered air conditioner during the summer, and a gas-fueled furnace during winter. All units come fully charged and tested—direct from the factory.

EXCEPTIONAL QUALITY

You can depend on well-designed, top-quality, thoroughly tested products.

Our production facilities are focused on strict, quality-driven processes. This quality focus ensures a trouble-free installation and long product life.

RELIABILITY AND LONG LIFE

One of the most critical components of a packaged gas/electric unit is the heat exchanger. Our unique, aluminized-steel tubular heat exchangers provide incredible durability and heating capacity. Additionally, the Goodman brand GPG13 Packaged Gas/Electric Unit utilizes a reliable direct-spark ignition system and integrated controls with on-board diagnostics, plus a combination redundant gas valve and regulator for further safety and reliability.

Our GPG13 Packaged Gas/Electric Unit also boasts a high-performance, energy-efficient compressor, which operates in tandem with our high-efficiency coil. The coil is made of refrigeration-grade copper tubing and aluminum fins in a design that maximizes surface area. These high-quality components together cool your home effectively, while saving you money on your energy bills as compared to lower SEER units.

IMPRESSIVE FEATURES AND BENEFITS: **GOODMAN® BRAND GPG13** CONVERTIBLE, ENERGY EFFICIENT PACKAGED UNIT

- 2 to 5 ton cooling capacity, single phase
- High-quality, energy-efficient compressor
- Durable, corrosion-resistant T-140 aluminized-steel tubular heat exchanger
- Dual-diameter tubular heat exchanger
- Fully-charged R-410A system
- High-quality coil made of refrigeration-grade copper tubing and aluminum fins protected by a louvered cabinet/coil guard
- Heavy-gauge, galvanized-steel cabinet with UV-resistant powder-paint finish resists fading and corrosion
- Fully-insulated blower compartment for quiet operation
- Meets California low-NOx emissions requirements
